Coalburn Miners Welfare Charitable Society

One Stop Shop

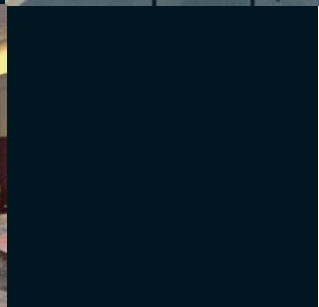

The One Stop Shop project is a national initiative launched in 2000 by the Coal Industry Social Welfare Organisation with the overall aim of enabling Miner s Welfare Schemes to increase their engagement in social and economic activities for the good of the communities they serve.

# There is no blueprint for a One Stop Shop.

Essentially, its role is to create a welcoming place. A focal point which, through partnership with statutory and voluntary bodies, offers a diverse range of facilities specifically chosen to fulfil the needs of the local community.

Many local organisations benefit from the flexibility of the Centre and it is an ideal location for the provision of services such as Citizens Advice Bureau, JHP Training, Routes to Work South, Healthy Valley, Rathbone and Local Authority surgeries.

The centre is fully equipped with disability access, catering facilities and IT capability.

▶ Conference Facilities
